

CUBOGRIT® K

The continuously CBN-coated band saw blade

- Product level 2
- Band width 10 x 0.5 100 x 1.1mm
 Band width 3/8 x 0.020 4 x 0.042 Inch
- Workpiece dimension small
- Continuous CBN-coating

Product Information

The CBN-coated band saw blade

WIKUS expands its portfolio of the coated band saw blades by the new product CUBOGRIT® which uses cubic boron nitride (CBN) as cutting material. Cubic boron nitride is the second hardest material known. Besides a high hardness and strength, also thermal and chemical resistance are its properties. Due to these properties, CUBOGRIT® band saw blades are ideal for the reliable processing of hardened ferrous materials and hard alloys as well as for hard alloys produced in 3D-print. From now on, even the hardest alloys up to 70 HRC can be cut economically with CUBOGRIT®.

Application

- hardened high speed steel (HSS), case-hardened steels
- high-alloy tool steels > 55 HRC
- iron-based powder coatings, chilled casting, stellite
- small workpiece dimensions

Advantages

- · no chipping at the edge of the contours
- · low reworking due to very good cutting surfaces

Features

- complete CBN-coating at the band edge
- · backing material made of alloyed tempering steel

CUBOGRIT® K is also available with a backing material made of corrosion-resistant special steel as CUBOGRIT® K VA.

This execution offers the following advantages:

- · cooling with pure water
- no corrosion of backing material during longer downtime

Machine requirements:

- cutting speed higher than 1200 m/min
- high machine stability
- high torque of the drive engine
